Objective:

To work in a company where my advanced analytical skills, network administration experience, knowledge of network technologies, of UNIX operating systems and communication skills are needed.

Summary

- Advanced experience with CISCO routers and switches;
 - Advanced experience with Nortel Networks router and switches;
 - Advanced experience as Unix (Linux, BSD, Solaris) system administrator;
 - Experience as Windows NT/2000 system administrator;
 - Demonstrated experience as network administrator.
-

Relevant experience

- **September 2000 – present**
"Special Telecommunications Service" – senior network administrator.
 - **June 2000 – September 2000**
"Miami Computers" - network administrator.
-

Education

- **1998-1999**
M.S. in Computer Science, Politechnic University, Bucharest, Romania;
 - **1993-1998**
B.S. in Computer Science, Politechnic University, Bucharest, Romania;
 - **2004**
„Building Scalable Cisco Internetworks” .
-

Skills

Networking experience

- ISP level experience with a large range of Cisco routers, from 800 to 7600 families
- ISP level experience with Cisco switches, from Catalyst 2950 to 6500 platforms
- Experience with Nortel routers and switches, HP switches and various other vendors
- ISP level experience with various routing protocols including BGP, OSPF, EIGRP experience with different management systems and protocols: SNMP, Syslog, CLI, expect scripting etc.
- TCP/IP and application (SMTP, HTTP, POP3, FTP telnet, etc.) protocol knowledge

Security experience

- Checkpoint firewalls and Ipsec VPN's on different hardware platforms, such as Nokia, Nortel Alteon etc.
- Various "hardware" firewalls like Nortel Networks Contivity, Checkpoint SofaWare, Juniper Netscreen
- Linux firewalls based on ipfwadm, ipchains and iptables.
- Various security tools: nmap, Tripwire, tcp wrappers, pgp, gpg, secure shell etc.
- Experience with CISCO PIX and ASA firewalls

Software experience

- ISP level administrator for the following UNIX operating systems: Linux (Debian, Slackware, Redhat), FreeBSD,
- Administrator for Windows NT, Windows 2000 and Windows 2003
- ISP level administrator for Apache web server (including SSL)
- ISP level administrator for mail servers: exim, postfix, sendmail, including virtual domains configuration
- ISP level administrator for various Internet servers: DNS (bind), Squid proxy server, ftp servers, etc.
- Network utilities: nslookup, tcpdump, netcat, etc.

Other skills

- Hardware setup and troubleshooting in UNIX and Windows
- Web programming: HTML, CGI, PHP, Perl
- Various programming languages: C, C++, Perl, PHP, Shell scripting languages etc.
- Interest in security research, cryptography, PKI, vulnerability analysis, penetration testing and security policy compliance
- Category B driving license

Languages

- English - well
- French - fair
- Romanian - native
